## AGENDA

**PRCU Program Role**

**PRCU Capabilities Overview**

**System Configuration**

**Physical Configuration**

**Subsystems**

- Fluids/Structures
- Power
- Video
- C&DH

**Block Diagram**

***KSC TEST AND CHECKOUT SYSTEMS***

**PRCU PROGRAM ROLE**

**Payload Rack Checkout Unit (PRCU)**

- Distributed verification of payload interfaces to the ISS Interface Control Documents (ICDs).
- KSC PRCU is used for
  - » Re-verification of payload interfaces as required
  - » Verification of ISPR/EXPRESS rack or attached payloads required by Payloads Office to undergo verification in PRCU prior to testing in PTCS
  - » Offline Post-Delivery Check

***KSC TEST AND CHECKOUT SYSTEMS***

**PRCU CAPABILITIES OVERVIEW**

**PRCU PROVIDES:**

- Verification of payload to space station interfaces for U.S. Payloads (ISPR, EXPRESS, or Attached)
- Single payload – “multi-rack” checkout
- Subsystem interface testing
  - » Fluids/Structures
  - » Power
  - » Video
  - » Command and Data Handling (C&DH)

*KSC TEST AND CHECKOUT SYSTEMS*

**SYSTEM CONFIGURATION**

**Insert PRCU Interface Overview from PRCU User Guide**

*KSC TEST AND CHECKOUT SYSTEMS*

**PRCU PHYSICAL CONFIGURATION**

**Insert KSC PRCU Facility Drawing**

***KSC TEST AND CHECKOUT SYSTEMS***

**SUBSYSTEMS**

**FLUIDS/STRUCTURES**

- **System Capabilities:**
  - » Includes GN<sub>2</sub>
  - » Vacuum Exhaust & Resource
  - » Thermal Control System (TCS)
    - Moderate Temperature Chiller
    - Low Temperature Chiller
  - » Raised Access Floor, and Support Structure

**POWER SUBSYSTEM (EPS)**

- **System Capabilities:**
  - » Upcoming upgrade will allow local control via Programmable Electrical Power Supply Emulator (PEPSE) front panel and remote control via PRCU Sun workstation

***KSC TEST AND CHECKOUT SYSTEMS***

**SUBSYSTEMS**

**VIDEO**

- **System Capabilities:**
  - » **Differential or Single-Ended**
  - » **CVIU for conversion of PFM to NTSC video**
  - » **Lightwave Multimeter to measure Optical Power**

**COMMAND & DATA HANDLING (C&DH)**

- **System Capabilities:**
  - » **LRDL, MRDL, and HRDL emulation**
  - » **Simulates C&C MDM**
